

## ***Montana Fish, Wildlife & Parks***

### **LEGAL NOTICE September 9, 2008**

A final Environmental Assessment (EA) addendum has been prepared for the Crooked Creek Treatment. The final action will be for treating approximately 5 miles of Crooked Creek on Custer National Forest and BLM administered land within the Pryor Mountains with rotenone. This will remove a limited brown trout population from above a permanent fish barrier, and protect and expand a genetically pure population of native Yellowstone cutthroat trout located in the upper drainage.

The EA can be reviewed on the Fish, Wildlife & Parks (FWP) website at [fwp.mt.gov](http://fwp.mt.gov) under recent public notices.

Questions and comments will be accepted through October 9, 2008, and may be addressed to Ken Frazer, FWP, 2300 Lake Elmo Drive, Billings, Montana, 59105, or e-mailed to [kfrazer@mt.gov](mailto:kfrazer@mt.gov). Copies of the draft EA can be obtained from the FWP office at the above address or by calling 247-2963.

**Legal Notice to appear three times, once a week, prior to comment period deadline.**

**News Outlet:** Please FAX legal notice dates to 248-5026 as soon as possible
